

Take Stock.

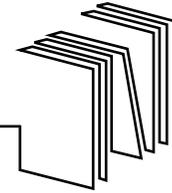

EUROSOFT
Innovative Software for Manufacturing

 **INSTOCK**
INVENTORY AND REMNANTS

Manufacturing Magic

InStock Take Stock

InStock is a powerful, time and money saving software tool that gives the user the ability to optimize, organize and track stock material as well as reusable remnants that might otherwise have gone to waste.

The Power of Managed Data

InStock is designed to facilitate the creation and maintenance of a materials database that can contain both full-sized sheets and remnants (offcuts, scrap, etc.).

The benefits of a managed database system:

- Track full size sheets for accurate inventory and reordering
- Track and reuse remnants (offcuts, scrap, etc.) to maximize material yield
- Integrate directly with optimization software such as BlueCell and some other 3rd party softwares
- Introduce order to chaotic material systems
- Compatible with barcode and scanning systems

If you would like to make use of remnants but struggle with organization and/or the efficient utilization of remnants in ongoing jobs, then InStock is the ideal solution. InStock automatically stores and tracks remnants from previous optimizations or nests which can then be recalled in subsequent optimizations to further improve material efficiency and keep remnant inventory under control.

Our customers include manufacturers in the cabinet, closet, boat, door, windows, office & residential furniture, institutional, paneling & partitions, cut-to-size, store fixture, glass, metals and plastic industries

Typical Remnant FAQs and Installation of InStock

What savings can be expected with remnant re-use?

- That depends on the yield. As a rule of thumb, 1/4 - 1/3 of waste can be recuperated.
Example: 85% yield = 4 - 5%, 75% yield = 6 - 8%

Does it store remnants for all materials?

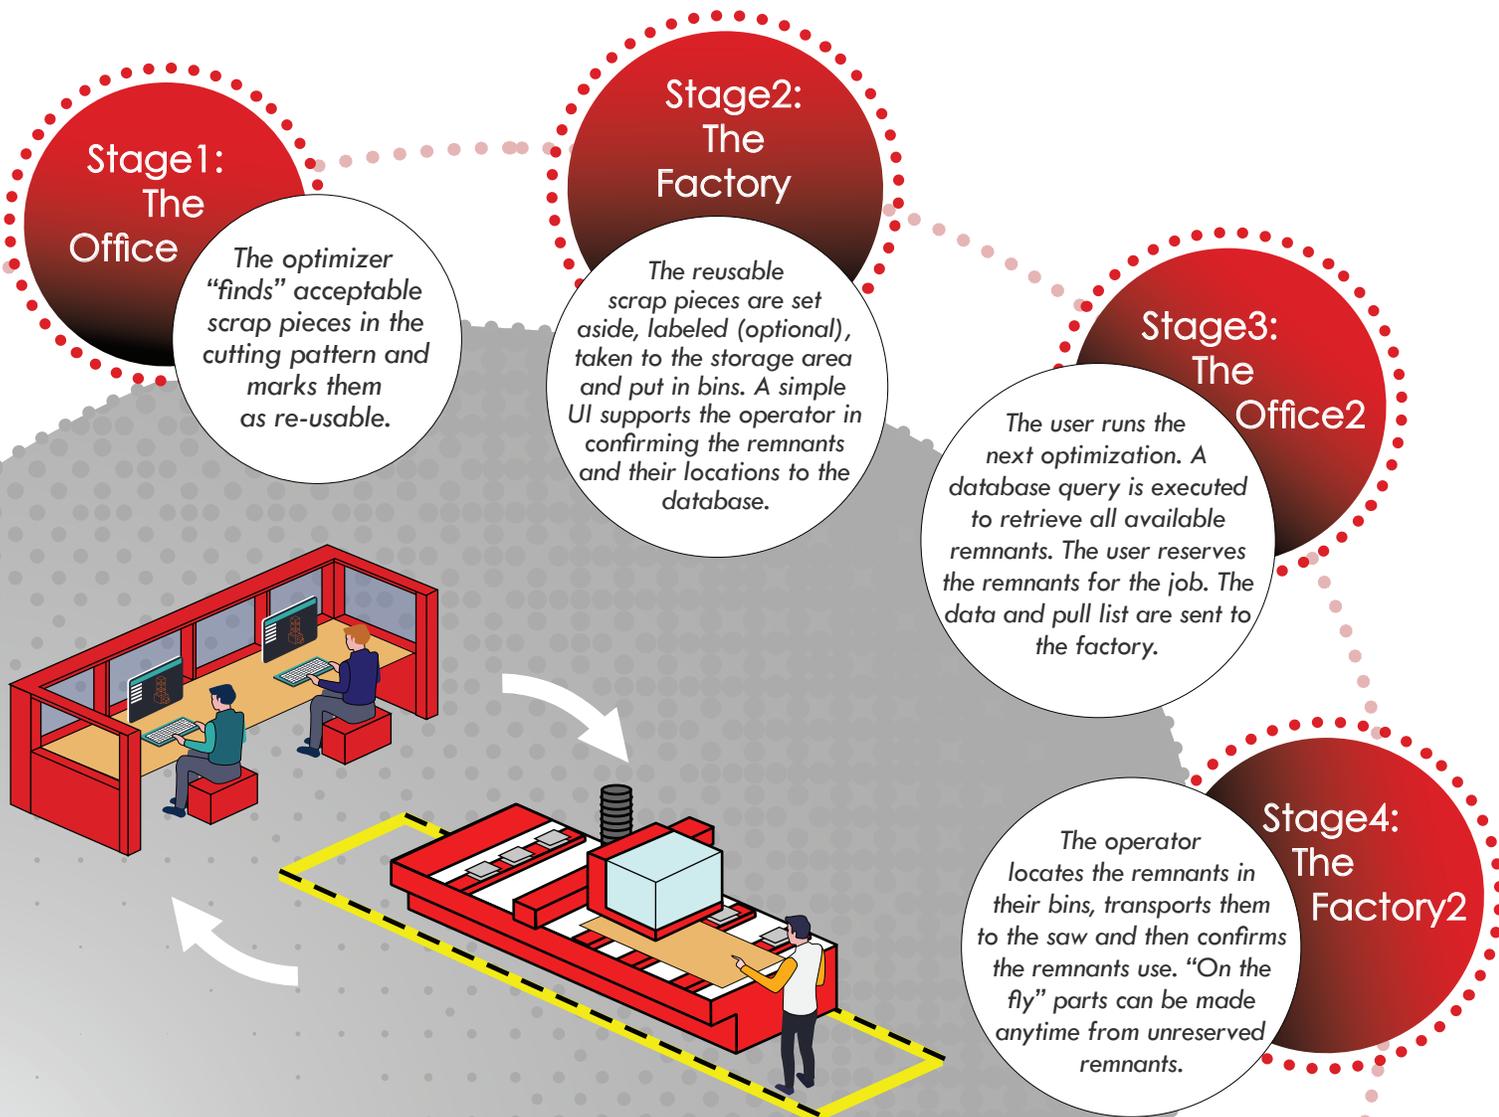

- That's totally up to the user. InStock can be used to track as many material types and sizes as desired

Can the minimum remnant size be adjusted?

- Yes, this is user definable and can be designated for each material

What happens if a remnant cannot be found?

- InStock can suggest suitable replacements for retrieval or a full size sheet can be substituted
